

Jack has been very active with his troop, participating in many scout activities. Over the many years Jack has been involved with scouting, he has not only earned numerous merit badges, but also the respect of his family, peers, and community. Most notably, Jack has earned the rank of Firebuilder in the Tribe of Mic-O-Say. Jack has also contributed to his community through his Eagle Scout project. Jack led fellow members of his swim team in putting together a class for basic swim lessons, providing a valuable life lesson to the children he taught.

Mr. Speaker, I proudly ask you to join me in commending Jack Knipp for his accomplishments with the Boy Scouts of America and for his efforts put forth in achieving the highest distinction of Eagle Scout.

RESPONSIBLY AND PROFESSIONALLY INVIGORATING DEVELOPMENT ACT OF 2013

SPEECH OF

**HON. CHRIS VAN HOLLEN**

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, March 6, 2014*

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 2641) to provide for improved coordination of agency actions in the preparation and adoption of environmental documents for permitting determinations, and for other purposes:

Mr. VAN HOLLEN. Mr. Chair, I rise in opposition to H.R. 2641, which would limit public input in the federal decision-making process and short-circuit responsible review of taxpayer-funded projects.

This legislation would create a new, convoluted review process for certain projects, setting rigid, arbitrary deadlines for even the most complex and hazardous plans and deeming them approved if the deadlines are not met. It allows for clear conflict of interest by giving project sponsors the authority to do their own environmental review. Finally, it confuses the process and risks litigation by blurring lines between state and federal law, and agency and private sector authority.

Complicating our public input process will not jumpstart construction projects. The only way to do that is by replenishing the Highway Trust Fund to repair our crumbling roads and bridges, and investing in the backlog of already-approved water resources projects that are on hold due to lack of funds. I urge my colleagues to support infrastructure investment and vote no on this bill.

IN RECOGNITION OF THE JAMIE GRODSKY PRIZE FOR ENVIRONMENTAL LAW SCHOLARSHIP

**HON. JOHN CONYERS, JR.**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, March 12, 2014*

Mr. CONYERS. Mr. Speaker, I rise to commemorate the fourth anniversary of the Jamie Grodsky Prize for Environmental Scholarship. It is awarded annually to a George Washington law student who contributes an original

paper to the environmental law field. The award is given in memory of Jamie Grodsky, a law professor at George Washington University, who passed away on May 22, 2010.

There is no doubt in my mind that legal scholarship in the field of environmental law plays a critical role in developing innovative ideas and thoughts to help preserve our citizens' quality of life, health, and safety. As a result, the annual award of the Jamie Grodsky Prize serves as not only a fitting tribute to Professor Grodsky, but helps preserve and protect our environment and our planet.

The Grodsky Prize is funded through the generosity of her family and friends, and is awarded annually to a George Washington law student who contributes an original paper to the environmental law field, as judged by a panel of experts. Tomorrow will mark the fourth time this award has been given. This year's recipient is Molly Masterton, who wrote on "Promoting Marine and Hydrokinetic Energy and Managing Environmental Risk: Toward an Adaptive Management Strategy."

Past Grodsky Award recipients include: In 2011, Renee Martin-Nagle for her paper titled "Fossil Aquifers: A Common Heritage of Mankind."

In 2012, Lieutenant Commander Jonathan Dowling's paper titled "Improving Energy Security with the Great Green Fleet: The Case for Transitioning from Ethanol to Drop-In Renewable Fuels."

In 2013, Joel Meister, for his paper titled "Sunny Dispositions: Modernizing Investment Tax Credit Recapture Rules for Solar Energy Project Finance After the Stimulus."

We look forward to the award of many more Grodsky prizes to deserving George Washington University students.

The fourth anniversary of the award is also an opportunity to recognize the life of Professor Grodsky, a preeminent member of the Nation's environmental bar, whose legal imprint continues to this day. Although time and space limitations do not permit me to itemize all of Jamie's contributions and unique talents and gifts, I would like to note a few highlights (many of Jamie's contributions were referenced in the CONGRESSIONAL RECORD by Rep. MILLER on September 15, 2010):

Prof. Grodsky left an indelible mark on all three branches of government, countless law students at the University of Minnesota and George Washington University, and the environmental and legal community as a whole.

Jamie served the Congress initially as an analyst with the then Official of Technology Assessment, and later as counsel to the Natural Resources Committee in the House, and the Judiciary Committee in the Senate.

She served as Senior Advisor to the General Counsel of the Environmental Protection Agency during the Clinton Administration.

She served as clerk to the Chief Judge of Ninth Circuit, the Hon. Proctor Hug, who referred to Jamie as "the most multi-talented person I have ever met."

Jamie was dedicated to environmental causes, acting as Educational Director of the San Francisco Oceanic Society and she conducted marine research at Woods Hole Oceanographic Institute in Massachusetts.

After leaving government service, Jamie dedicated herself to passing along her passion for the environment through her work in academia, eventually becoming a tenured Professor of Environmental Law at George Washington University.

Although Jamie's passing was a tremendous loss to us all, I am pleased that that her legacy is continuing to inspire the next generation of attorneys through the annual award of the Jamie Grodsky Prize.

JOHNNIE DINA

**HON. ED PERLMUTTER**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, March 12, 2014*

Mr. PERLMUTTER. Mr. Speaker, I rise today to recognize and applaud Johnnie Dina for receiving the Arvada Wheat Ridge Service Ambassadors for Youth award. Johnnie Dina is an 11th grader at Standley Lake High School and received this award because her determination and hard work have allowed her to overcome adversities.

The dedication demonstrated by Johnnie Dina is exemplary of the type of achievement that can be attained with hard work and perseverance. It is essential students at all levels strive to make the most of their education and develop a work ethic which will guide them for the rest of their lives.

I extend my deepest congratulations to Johnnie Dina for winning the Arvada Wheat Ridge Service Ambassadors for Youth award. I have no doubt she will exhibit the same dedication and character in all of her future accomplishments.

ELECTRICITY SECURITY AND AFFORDABILITY ACT

SPEECH OF

**HON. JOHN D. DINGELL**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, March 6, 2014*

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 3826) to provide direction to the Administrator of the Environmental Protection Agency regarding the establishment of standards for emissions of any greenhouse gas from fossil fuel-fired electric utility generating units, and for other purposes:

Mr. DINGELL. Mr. Chair, I agree with my dear friend Chairman WHITFIELD that we must provide clarity on EPA's authority to regulate greenhouse gases. However, as we have seen all too often in the 113th Congress, the legislation before us does nothing to address the underlying problem. Instead, this bill simply blocks the EPA from taking action without providing any alternative solution.

My first problem with this legislation is that it creates a peculiar and entirely new process for regulations under the Clean Air Act. This bill would take a long-established and reasonably well understood and turn it upside down to the great detriment of all of those in industry who are seeking certainty. This bill would then eliminate the delegation of rulemaking authority to EPA and set up Congress as a regulatory agency. Traditionally, Congress has given EPA the authority to develop regulations to address particular issues. I'm concerned that we may be setting a troubling precedent that allows regulations to be set without extensive public comments or technical data and input from industry and stakeholders.
